

## Football Training Products Inflatable Football Goal Mini Soccer Goal Posts

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: AVG (SoccerWing)
- Certification: ISO9001
- Model Number: 3 Man Soccer Goal
- Minimum Order Quantity: 1
- Price: USD 366 - USD 3496 /Set
- Packaging Details: air bubble film or carton
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10000000 Sets/year

### Product Specification

- Material: Electrostatic Powder Spraying On All Aluminium Alloy
- Item: Football Training Products Professional Inflatable Football Goal Mini Soccer Goal Posts
- 11-Man Soccer Goal Size: 7.32m X2.44m X2.15m
- 7-Man Soccer Goal Size: 5mx 2m X1.58m
- 3-Man Soccer Goal Size: 1.2mx 0.8m X0.5m
- Professional Assembly Type: 3 Man
- Highlight: soccer goal post, football field equipment

## Product Description

### Football Training Products Professional Inflatable Football Goal Mini Soccer Goal Posts

3-Man standard soccer goal

specifications:1.2m 0.8m 0.5m

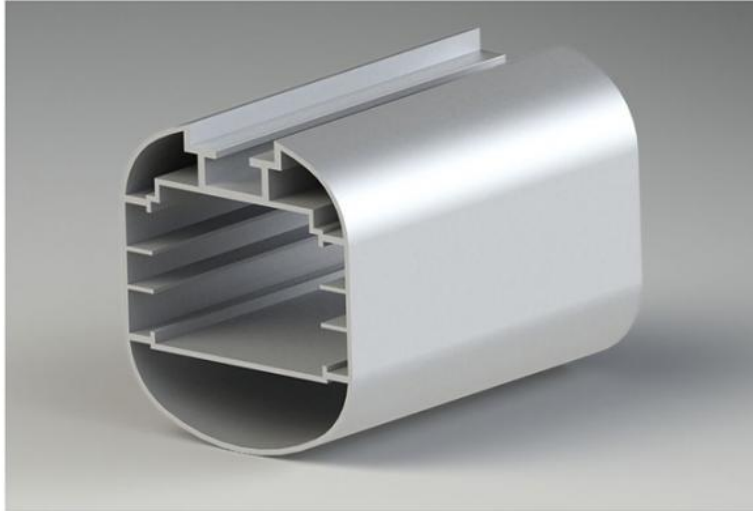

material quality: electrostatic powder spraying on all aluminium alloy

thicker and high wear-resisting standard football net

characteristics: long lifetime, lifelong rust protection, mobility

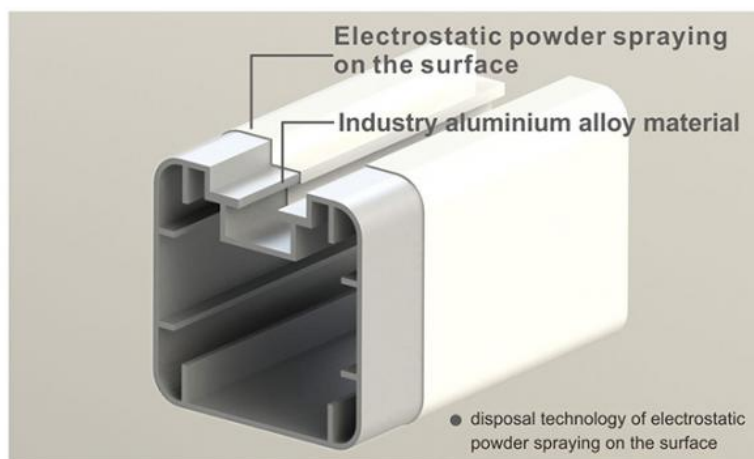

retail price:USD366 / pair

Aluminum is one of the most widely used non-ferrous metal structural materials in industry. It has been widely used in aviation, aerospace, automobile, machinery manufacturing, shipbuilding and chemical industry. Aluminum alloy has the following performance characteristics:

- 1, high strength - aluminum alloy has low density and high strength, and its performance is close to or better than high quality steel;
- 2, convenience - the density of aluminum is 2.7g / CM<sup>3</sup>, about 1/3 of that of steel and copper, with great portability;
- 3, corrosion resistance - in most environments, including air, water (or salt water), petrochemical and other circumstances, aluminum has a good corrosion resistance;
- 4, recyclability - aluminum has a high recovery value, there is almost no difference between recycled aluminum and primary aluminium

Electrostatic powder spraying features:

- 1, Non-toxic, no solvents, no volatile toxic substances, no poisoning, no fire, no "three wastes" emissions and other public hazard problems, in full compliance with national environmental law requirements;
- 2, High coating density, good adhesive force, shock strength and toughness, high corners coverage, with excellent resistance to chemical medicine corrosion and electrical insulation properties.
